DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to "A container device for the long-term storage of hazardous material", classified in class 250, subclass 506.1.
 - II. Claims 8-14, drawn to "A method for manufacturing a container device for the long-term storage of hazardous material", classified in class 250, subclass 526.
 - III. Claim 15, drawn to "An installation for manufacturing container devices for hazardous material", classified in class 250, subclass 517.1.

2. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
